MULTIPLEX GROUP OF COMPANIES

Since 1974

Come Let’s Grow Together
Established in 1974 by exceptionally foresighted Dr. G. P. Shetty, a Doctorate in Plant Physiology and Plant Nutrients.

Our Group is one of the leading manufacturers and exporters of Bio-Organic Manure, Micro Nutrients, Bio-Fertilizers, Bio-Pesticides, Bio-Activators and Chemical Pesticides in India.

All our Products available for Agricultural, Horticultural, Sericulture, Plantation crops, Fruits and Vegetable Crops are field tested and certified by various esteemed Agricultural Research Institutions and Universities of INDIA.

Our Group consists of 24 Branches across India with 1000+ employees.
Dr. G P Shetty born in an agrarian family of Udupi district, Karnataka state in the year 1940, completed his schooling in his native place and then moved to Willingdon College, Sangli for his graduation and later attended post-graduation and doctoral programme in “Plant Physiology and Plant Nutrition” at Shivaji University, Kolhapur.

The idea of path to progress embarked upon by Dr. GPS in spreading the message of scientific cultivation of crops through soil health management, crop nutrition and crop protection made even the State Governments and various research bodies to initiate action on integrated crop nutrition and crop protection management.

Recognizing his immense contribution to sustainable development of agriculture, the Government of Karnataka bestowed upon him with Rajyotsava Award for Agriculture-2008. In addition, he is also the recipient of many awards conferred upon him by several organizations.

MULTIPLEX SAMBRAMA is a multi micronutrients mixture.

Most of the nutrients are in chelated form.

WHAT IS IT?

COMPOSITION

This contains all essential plant nutrients like major nutrients – N, P, K; secondary nutrients—Ca, Mg, S and micronutrients like Zinc, Manganese, Iron, Copper, Boron & Molybdenum.

FEATURES

Easy to Use and provides Micro Nutrients for an extended usage

ORGANIC MANURE

BIO REMEDIATOR
**MULTIPLEX ANNAPURNA** is a well decomposed organic matter.

**WHAT IS IT?**

It is non-toxic and eco-friendly.

**FEATURES**

**COMPOSITION**

It is fortified with neem cake, castor cake, pongamia cake, vermicompost and also enriched with millions of beneficial nitrogen fixing bacteria i.e. Azotobacter, Azospirillum, Rhizobium, Phosphate solubilizing bacteria and Potash mobilizing bacteria.

**BENEFITS**

- Improves soil structure resulting in better root proliferation and also improves soil fertility.
- Minimizes the use of chemical fertilizers.
- Has larvicidal activity and also acts as a strong repellant to insects.

**OUR BIO PRODUCTS RANGE**

MULTIPLEX SHUDDI is a multipurpose product, which can be used in agriculture, aquaculture, water bodies, sanitation, cleaning up contaminated sites, food preservation. This is a bioremediation product.

- Safe for human beings, animals & environment
- Readily Biodegradable
- 100% Bio-product
- Free from chemicals
- Shuddi application helps to reduce epidemics

It is a consortium of live microbial formulation of selected strains of naturally occurring microbes.

- Elimination of bad odour
- Repel insect vectors like mosquito, flies etc.
- Reduces suspended solids
- Reduces sludge volume
- Reduces surfactants/chemicals
- Reduces ground water contamination

WHAT IS IT?

MULTIPLEX SOLDIER- WP is a well decomposed bio pesticide.

FEATURES

The nematodes when meets the pest insect, it enters the body through openings along with associated bacteria which causes septicemia (blood poisoning).

COMPOSITION

This contains Heterorhabditis indica, entomopathogenic nematodes.

BENEFITS

The nematodes eat, multiply inside the insect body and kills it. It kills pests like root grubs, termites, cut worm, root weevils and other soil borne pest.

We for the past 4 decades has come out with a pioneering initiative called “Collaborative Agriculture” to partner with you in developing or to make your barren land as well as semi cultivated land green productive.

Since 1991, our small soil and fertilizer testing laboratory in Bangalore, has gradually expanded to include analysis of soil, water, plant, organic manures & fertilizers by adopting standard procedures with latest technology.

Multiplex has a unique vision of bringing all the farmers of the country under one umbrella called “Multiplex Farmers Club” for dissemination of latest information in the field of agriculture, and get other benefits offered by Multiplex group.

Multiplex Vaahini is published for the benefit of farmers to disseminate useful and practical knowledge on Agriculture and Horticulture. The magazine is edited by a team of experts in the field of Agriculture and Horticulture.
KRISHI VIKAS RATH

We have commissioned 17 numbers of “Krishi Vikas Rath” to educate the farmers on scientific production of crops at their door steps. Some of the objectives of “Krishi Vikas Rath” are:

- We meet the farmers at their doorsteps.
- We conduct trials and test the efficacy of new product at various Agro-climatic zones.
- We educate and advise farmers at their doorsteps on various aspects of sustainable agriculture like - Soil Mgmnt, Water Mgmnt, Crop Mgmnt, Pest Mgmnt, Nutrient Mgmnt, Harvest & Post-Harvest Mgmnt, Environment Mgmnt.
- We have collaboration with senior scientists and extension specialists of State Agriculture Universities, State Dpt. of Agriculture, and other premier research institutes.
