

# ARECA GREEN

Secondary and Micronutrients Fertilizer

FOR EFFECTIVE MANAGEMENT OF  
YELLOW LEAF DISEASE

*Farmers' first choice since 1974*

# Multiplex Areca Green

## Secondary and Micronutrients Fertilizer

Multiplex Areca Green is a blend of Secondary and Micronutrients, uniquely formulated fertilizer for Arecanut crop. Arecanut is one among the important horticultural crop gaining high economic value in India. The betel nuts obtained from Arecanut trees are considered auspicious in traditional rituals and moreover, the daily consumption of betel nuts is passed down from generation to generation. The cultivation of Arecanut has rapidly increased from the past decade for its commercial potential. However, during these years Arecanut plantation has significantly reduced productivity, becoming susceptible to yellow leaf disease, it is due to unscientific management of areca nut cultivation, excess use of only inorganic NPK fertilizers without using secondary and micronutrients. Hence Application of Multiplex Arecanut green periodically fulfills the gap of secondary and micronutrient which are much essential to suppress yellow leaf disease, increases flower setting, avoids premature falling of nuts, prevent nut splitting, and improve yield both by quality and quantity.

### DIRECTION FOR USE

Apply 150 to 200 g Multiplex Areca Green per plant in two split doses, first split dose in May/June and the second split dose in September/October.

### BENEFITS OF MULTIPLEX ARECA GREEN

- Improves physical, chemical, and biological properties of soil.
- Increases the number of feeding roots, and helps uptake of other nutrients from the soil.
- Increases rate of photosynthesis.
- Induces regular bearing of inflorescence, flowering setting, and enhances number nut formation.
- Helps to overcome physiological disorder like Nut dropping, Nut Splitting and develops resistance against Band Disease
- It helps in increasing the size and weight of the nuts, thereby increasing crop yield by 10 to 30%
