

# BANANA SPECIAL<sup>®</sup>

MULTI MICRONUTRIENTS FERTILIZER

FOR SOIL APPLICATION

*Farmers' first choice since 1974*

# MULTIPLEX BANANA SPECIAL

## MULTI MICRONUTRIENTS FERTILIZER

Banana is a tropical crop and requires hot and humid climatic condition for good growth and yield. Banana crop is a heavy nutrient feeder. The roots absorb large quantity of essential nutrients from the soil. Improper nutrient management and soil deterioration leads to nutrient deficiency in plants resulting in improper growth and bunch development. To achieve the potential yield of banana crops it is crucial to supply all the essential nutrients in balanced quantities at various growth stages. Multiplex Banana Special is formulated to address nutrient deficiencies effectively. It contains secondary and micronutrients that stimulate robust shoot, root development and enhance the resistance in plants against biotic and abiotic stress, and ensures uniform bunch formation. This leads to increased yield both in quality and quantity.

### DIRECTION FOR USE

Apply Multiplex Banana Special in three split dosages 20 g per plant. The fertilizers should be applied in the basin dug around the plants at 45 cm, 60 cm and 75 cm at 3rd, 5th, and 7th month after planting.

### BENEFITS OF MULTIPLEX BANANA SPECIAL

- Promotes vigorous growth of banana plants
- Enhances photosynthetic activity there by increases the leaf area
- Ensures uniform bunch formation and maturation
- Increases higher number of hands per bunch
- Increases bunch weight and size
- Improves the quality and quantity of the yield by about 20 to 30%

Available Packing: 5 kg & 10 kg
