CHAMAK[®]

MULTIMICRONUTRIENTS FERTILIZER

Farmers' first choice since 1974

CHAMAK[®]

MULTIMICRONUTRIENTS FERTILIZER

Calcium and boron are essential nutrients required for the healthy growth and development of plants. However, both calcium and boron are often less available in the soil and are highly immobile within plants. Severe deficiencies of these nutrients can disrupt plant metabolism, leading to poor growth and development. This can result in physiological disorders, increased susceptibility to pests and diseases, reduced quality of the produce and ultimately lower yields. Multiplex Chamak provides an effective solution by combining easily accessible forms of calcium and boron. Calcium is a major component of the cell wall and contributes to plant stability, while boron is crucial for various physiological processes, including pollen tube development, pollination and the setting of flowers and fruits. Most fields, oilseeds, and plantation crops require significant amounts of calcium and boron to complete their life cycles and to enhance yield in both quality and quantity.

DIRECTION FOR USE

- **FOR FOLIAR SPRAY:** Dissolve 3 g of Multiplex Chamak in one liter of water and spray on both surfaces of the leaves and fruits. We recommend two to three applications during the flowering and fruit development stage. For better results mix Multiplex Maxiwet at one ml or Multiplex Nagastha-180 at 0.5 ml per litre of prepared spray solution.
- **FOR DRIP IRRIGATION:** Dissolve Multiplex Chamak 500 grams in 200 liters of water and fertigate through drip for one acre.

BENEFITS OF MULTIPLEX CHAMAK

- ♦ Multiplex Chamak revitalizes the Plants and corrects deficiencies of Calcium and Boron in plants
- ♦ Strengthens plant cell wall, improves plant stability there by reduces chance of pest and disease attack
- ♦ Improves keeping quality of the harvested fruits
- ♦ Improves colour of the skin of potato and keeps curd of cauliflower bright white
- ♦ Prevents spongy tissue disease in mango, bitter pit in apple and blossom end rot in solanaceous crops
- ♦ Improves pegging and pod formation in ground nuts
- ♦ Improves pollen tube development, pollination and setting up of flowers and fruits

Available Packing: 100 g, 250 g, 500 g & 1 kg
