# COCONUT SPECIAL

## MULTI MICRONUTRIENTS FERTILIZER

Multiplex Coconut Special which has secondary nutrients and micronutrients in balanced quantity as per requirement is very essential for coconut palms. Coconut is one of the major commercial crops cultivated across Southern, eastern and western parts of India, which supplies food, tender coconut water, and edible oil apart. Coconut husk and pith are extensively used coir industries, paying the way increased coconut cultivation year after year. After the introduction of high yielding coconut varieties, there is demand balanced nutrients. The practice of addition of NPK alone has resulted in alarming decline in the status of secondary and micronutrients in the soil, thus affecting the yield of nuts, crown choke and pencil point disorder. In this scenario Multiplex Coconut special categorically formulated balanced nutrients for coconuts to obtain quality and quantity yield.

### DIRECTION FOR USE

**For bearing plants:** Apply 250 to 300 g of Multiplex Coconut Special per tree in two uniform split doses per year. First dose in the month of May-June and second dose during September-October.

**For non-bearing plants:** Apply 100 to 150 g of Multiplex Coconut Special per palm in two uniform split doses per year.

**Note:** Once after application of Multiplex Coconut Special provide optimal irrigation,
