# Golden MAHAPHAL<sup>®</sup>

## FOLIAR SPRAY

The agriculture sector is confronted with a significant dual challenge: it must boost productivity to feed an ever-growing global population while simultaneously enhancing resource use efficiency and minimizing the environmental footprint on both ecosystems and human health. In this critical context, bioactive natural substances, such as Multiplex Golden Mahaphal, emerge as an invaluable solution. This innovative combination product blends powerful bio-stimulants, including amino acids, humic acid, seaweed extract, triacontanol, and finely balanced trace amounts of chelated nutrients. Multiplex Golden Mahaphal plays a crucial role in augmenting soil nutrient availability, thereby facilitating improved nutrient uptake and assimilation by plants. The synergistic effects of these bio-stimulant substances work harmoniously to promote plant growth, increase resilience to various stressors, and optimize the utilization of soil nutrients. As a result, farmers can achieve enhanced crop yields while significantly reducing the environmental impact of their practices, ultimately paving the way for more sustainable agricultural methods that are vital in our quest to feed the world responsibly.

### DIRECTION FOR USE

Dissolve 2 to 3ml of Multiplex Golden Mahaphal in one liter of water and spray on both surfaces of the leaves. We recommend 2 to 3 sprays at an interval of 20-25 days during the crop development stage. Multiplex Golden Mahaphal can be given through drip irrigation at the rate of one liter per acre.

### BENEFITS OF MULTIPLEX GOLDEN MAHAPHAL

- Imparts lush green colour to foliage, improving photosynthetic activity.
- Improves resistance to diseases & pests.
- Helps in inducing more flowers and fruit setting
- Helps in stimulating plant hormones and thereby improves the absorption and utilization of applied plant nutrients.
- Improves efficiency of water usage.
- Strengthens stress tolerance and helps in speedy recovery.
- Improves the yield both by quality and quantity.

**Available Packing:** 1 liter, 500 ml, 250 ml and 100 ml
