A MIXTURE OF AMINO ACIDS

Farmers' first choice since 1974

Golden
SAMRAS[®]
BIOSTIMULANT
A MIXTURE OF AMINO ACIDS

Amino acids serve as bioinducers essential for many physiological processes in plants. They are the fundamental components of proteins, which are crucial for cell structure, enzyme activity, hormone synthesis, and the enhancement of plant pigments. Additionally, amino acids chelate plant nutrients and increase resistance against pests and diseases, highlighting their significance in agriculture. Multiplex Golden Samras is a plant protein hydrolysate rich in 20 natural amino acids like Alanine, Arginine, Asparagine, Aspartic acid, Cysteine, Glutamic acid, Glutamine, Glycine, Histidine, Isoleucine, Leucine, Lysine, Methionine, Phenylalanine, Proline, Serine, Threonine, Tryptophan, Tyrosine, and Valine. This product enhances the uptake of essential nutrients in plants and mitigates the negative effects of abiotic stressors such as salinity, drought, and heavy metals. As a result, it improves the productivity and quality of the production of Horticultural, Agricultural and Plantation crops

DIRECTION FOR USE

Dissolve 2 to 3 ml of Multiplex Golden Samras in one litre of water and spray on both surfaces of the leaves. We recommend two to three sprays starting from flower initiation at an interval of 15 to 20 days. Multiplex Golden Samras can be given through drip irrigation at the rate of one litre per acre.

Do not mix with copper or sulphur-based products while making spraying solutions.

BENEFITS OF MULTIPLEX GOLDEN SAMRAS

- Enhances the uptake of major, secondary and micronutrients by acting as a natural chelating agent.
- Promotes enzymatic activity in the plant system.
- Increases photosynthesis rate and enhances protein synthesis.
- Induces resistance against biotic and abiotic stress
- Improves flower & fruit setting.
- Improves size and colour while maintaining the quality of the produce.
- Improves the yield both by quality and quantity.

Available Packing: 1 liter, 500 ml, 250 ml and 100 ml
