MAGNESIUM SULPHATE

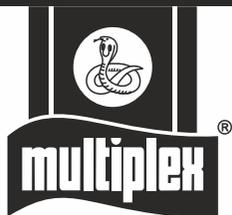

MAGNESIUM (as Mg) 9.50%

Multiplex Magnesium Sulphate contains essential secondary nutrient required for Plants. Magnesium is an indispensable mineral nutrient for plant growth, It is an integral constituent of the chlorophyll pigment, which is vital for photosynthesis process resulting in energy synthesis in the plants. Magnesium also aids in phosphate metabolism, plants respiration, activates enzymes, synthesis of organic compounds, amino acids that are useful for plant growth.

Magnesium Deficiency occurs in areas with high rainfall or wet regions, especially in light and acid soils. Application of Multiplex Magnesium Sulphate helps to overcome magnesium deficiency, imparts greenness in leaves, increases quality and quantity yield.

DIRECTION FOR USE

Soil Application: For field crops and oil seed crops 20 to 25 kg of Multiplex Magnesium Sulphate per acre.

Plantations: 150 to 200 g per tree twice a year.

BENEFITS OF MULTIPLEX MAGNESIUM SULPHATE

- ◆ Corrects magnesium deficiency quickly
- ◆ Application results in greener leaves as it is the central atom of chlorophyll
- ◆ Increases the rate of Seed germination and helps uptake of other nutrients
- ◆ Magnesium treated plants have high concentrations of starch in fruits
- ◆ Enhances the activities of absorption of other nutrients from the soil and increases resistance against pests and diseases
- ◆ Improves the yield both by quality and quantity

Available Packing: 5 kg, 10 kg, 25 kg & 50 kg

Manufactured by

KARNATAKA AGRO CHEMICALS

No. 180, 1st Main Road, Mahalakshmi Layout, Bengaluru - 560 086. INDIA
