

Mahaphal[®]

FOLIAR SPRAY

Farmers' first choice since 1974

Mahaphal[®]

FOLIAR SPRAY

Multiplex Mahaphal is a combination product of bio-activators like Amino acids, Humic acid, Seaweed extract, Triaccontanol and traces of micronutrients in balanced quantities. Among these micronutrients Zinc, Manganese, Copper, Ferrous are in chelated form, whereas Boron & Molybdenum are in ionic form.

DIRECTION FOR USE

Dissolve 2 to 3ml of Multiplex Mahaphal in one liter of water and spray on both the surfaces of the leaves. We recommend 2 to 3 sprays at an interval of 20 to 25 days during the crop development stage. Multiplex Mahaphal can be given through drip irrigation at the rate of one liter per acre.

Note: To get better results, it is recommended to apply Multiplex Mahaphal along with Multiplex Chamak at the rate of three grams or Multiplex Allbor at the rate of one gram in one liter of prepared solution during flower blooming, fruit set and fruit development.

Available Packing: 100 ml, 250 ml, 500 ml, 1 liter and 5 liters

BENEFITS OF MULTIPLEX MAHAPHAL

- Imparts lush green colour to foliage improving photosynthetic activity
- Improves resistance to diseases & pests
- Helps in inducing more flowers, fruit setting and results in getting good quality fruits.
