

PLANT AID

PROFUSE ROOT ENHANCER

Farmers' first choice since 1974

PLANT AID

PROFUSE ROOT ENHANCER

प्लांट ऐड
प्रोफ्यूज रूट एन्हेंसर

Multiplex Plant Aid contains mixture of, Indole Acetic Acid (IAA), Indole Butyric acid (IBA), Gibberlic acid (GA_3) and Alpha Naphthyl Acetic acid which are root growth hormones and hence stimulates profuse root growth. It increases the root length, branching and density of root hairs.

DIRECTION FOR USE

- **For Root Dipping:** Dissolve 1 gram of Multiplex Plant Aid in one liter of water and dip the cuttings for 30 minutes before planting.
- **For Nursery Beds:** Dissolve 1 gram of Multiplex Plant Aid in one liter of water and drench the solution on the nursery bed.
- **Drip Irrigation:** Dissolve 100 to 200 grams in 200 liters of water and feed the plot through drip for one acre.

BENEFITS OF MULTIPLEX PLANT AID

- Induces roots in the cuttings immediately
- Helps profuse root formation, increases root length, girth of root and density of root hairs
- Helps in fast establishment of the Planted cuttings
- Helps in overcoming transplantation shock
- Better anchorage of plants in the soil because of profuse rooting
- Keeps plants healthy & greener by more absorption of water and nutrients from soil

Packing: Multiplex Plant Aid is available in 100 & 250 grams.
