

# ProKissan

## MULTI MICRONUTRIENT FERTILIZER

FOR ALL CROPS

*Farmers' first choice since 1974*

# Multiplex ProKissan

## MULTI MICRONUTRIENT FERTILIZER

It is a special formulation for use as foliar spray or through drip or sprinkler irrigation. It contains well balanced mixture of chelated micronutrients such as Zinc, Iron, Manganese, Copper and Boron, Molybdenum in non chelated form to meet the demands of all agriculture crops such as Tomato, Chilly, Vegetables, Onion, Garlic, Ginger, Turmeric, Grapes, Pomegranate, Citrus etc., It is used to overcome the multiple Micronutrient deficiencies in crops. Multiplex Prokissan Stimulates growth and optimises yield of crops grown under poor growing conditions.

### DIRECTIONS FOR USE

Dissolve 1.0 g in one litre of water and spray liberally on both sides of the leaf. For all field crops, 2 to 3 sprays are recommended.

First spray: 25 to 30 days after transplanting / sowing.

Second spray: 20 days after first spray.

Third spray: 20 days after second spray.

### BENEFITS OF MULTIPLEX PROKISSAN

- Important nutrient elements are in chelated form and hence the best result is assured
- Corrects nutrient deficiency and takes care of nutrient requirements of the crop for better yield
- Increases number of flowers, Controls shedding of flowers and helps in the good setting of fruits
- Since most of the nutrients are in chelated form, it helps in the development of resistance against bacterial/ fungal diseases
