SRUSHTI[®]

(ZINC HIGH)

MULTI MICRONUTRIENTS FERTILIZER

सृष्टि[®]

(जिंक हाई)

मल्टी माइक्रोन्यूट्रिएंट फर्टिलाइजर

Using only major nutrient-containing fertilizers in agriculture on a large scale resulted in the deficiency of many secondary and micronutrients in plants. Micronutrient's deficiency is widespread in the form of hunger signs limiting productivity. This has resulted in the reduction of yield but increase in cost of production. Providing micronutrients to the plants will improve yield and increase productivity

Multiplex Srushti consists of all micronutrients in balanced form which are easily available to plant. These are used as fertilizers to overcome micronutrient deficiencies in plants, as well as a source of micronutrients for their normal growth and higher yields.

DIRECTION FOR USE

Apply at the rate of 5 kg of Multiplex Srushti per acre either at the time of sowing or at the time of transplantation/ earthing up.

BENEFITS OF MULTIPLEX SRUSHTI (ZINC HIGH)

- Provides high percentage of Zinc, Magnesium and following other nutrients like Calcium, Sulphur, Copper, Manganese, Iron, Molybdenum and Boron in balanced form as required by the plants.
- Enhances utilization of NPK nutrients applied to soil by the plants.
- Develops resistance to pests & diseases in plants.
- Maintains overall health, growth & development of the plant.
- Increases Number of flowers and fruits
- Increases number of bolls/plant in cotton
- Improves the quality and quantity of the yield up to 25%

Packing: Multiplex Srushti is available in 5 kg, 10 kg and 25 kg packings.
