**MULTIPLEX TRISHUL PLUS** contains Vesicular Arbuscular Mycorrhiza. VAM is a symbiotic fungus which forms a network of filaments that associate with plant roots and draw nutrients from the soil that root system would not reach. This fungus-plant alliance stimulates plant growth and accelerates root development. They also increase plant tolerance to different environmental stress. Moreover, these fungi play a major role in soil aggregation process and stimulate microbial activity. According to the plant species, growing practices and conditions mycorrhizae provides different benefits to the plants.

**DIRECTION FOR USE:** Multiplex Trishul Plus can be used on all crops as soil application. Mix 2 to 3 kg of Multiplex Trishul Plus in 20 kg of Multiplex Annapurna/ dried farm yard manure and broadcast over one acre of land.

**PRECAUTION:** Multiplex Trishul Plus should not mixed with any chemical pesticide, insecticide, fungicide and weedicide.
