NAGASTHA-180[®]

Sticking, Wetting and Spreading Agent

MULTIPLY NAGASTHA-180 is a non-ionic spray adjuvant concentrate which is completely water-soluble and works as spreader, activator, adjuvant and wetting agent. In modern agriculture, the use of pesticides and agrochemicals is essential in ensuring crop protection and production to meet the rapidly increasing food demand from the growing population. An improper wetting agent can cause problems such as foliar toxicity symptoms and prevent the foliar spray from entering the stomata. In the absence of wetter, large droplets will form on the leaves. These will either roll off the leaf quickly and be wasted or may cause burning when intense light is present. Multiplex Nagasta-180 is non-reactive and remains on the leaf surface for a long duration, permitting better penetration and utilization of spray solutions. It is compatible with prepared solutions of Insecticides, Fungicides, Herbicides and Foliar spray fertilizers for better sticking and spreading of sprayed solution.

DIRECTION FOR USE

Dissolve Multiplex Nagastha-180 in the already prepared spray solution as follows depending on Agro Input type

For Foliar Spray : Mix 0.4 to 0.5 ml of Multiplex Nagastha-180 in 1 litre of prepared spray solution and spray on both surface of the leaves

For Drip Irrigation: Mix 160 ml Multiplex Nagastha-180 in 100 liters of prepared solution & irrigate for one acre. Before using read all specific mixing instructions of pesticides, herbicide & foliar fertilizers.

PRECAUTIONS

- Avoid contact to eyes. In case of eyes contact, flush eyes thoroughly with water for 10 minutes and meet eye specialist
- In case of skin contact, wash thoroughly with soap and water

BENEFITS OF MULTIPLY NAGASTHA-180

- It reduces the surface tension of the water enabling the water droplet to cover greater leaf surface area
- Acts as activator agent and enhances performance of insecticides, fungicides, herbicides and foliar fertilizers sprayed
- It enhances the water holding capacity of the soil
- It is biodegradable and non-Corrosive to equipment's
- It reduces runoff and increase leaf penetration

AVAILABLE PACKING: 100 ml, 250 ml, 500 ml, 1 litre & 5 litres
