

**multiplex**®

# Navajeevan-G<sup>®</sup>

**BIOSTIMULANT**

**BOTANICAL EXTRACT INCLUDING SEA WEED EXTRACTS**

**MULTIPLIX NAVAJEEVAN-G IS AVAILABLE PACKING IN**

**Bags:** 5 Kg, 10 Kg, 25 Kg and 50 Kg,

**Buckets:** 10 Kg and 20 Kg and **Drums:** 25 Kg and 50 Kg.

*Farmers' first choice since 1974*

# MULTIPLEX NAVAJEEVAN- G

**MULTIPLEX NAVAJEEVAN-G** is a granulated Bio-Stimulant Organic Fertilizer containing seaweed extract, Humic Acid, Amino Acid and Triaccontanol, which promotes soil and plant health.

**Seaweed** is a naturally occurring aquatic plant which contains nutrients, amino acids, chelating agents, growth hormones, Alginic acid and Mannitol.

Humic acid is a microbial stimulant, soil conditioner and powerful natural chelating agent which are involved in improving soil structure, nutrient retention and uptake.

**Amino acid** is an essential building block of proteins in plants. The nitrogen absorbed by the roots in the form of nitrate or ammonia is converted into amino acids and then into proteins.

**Triaccontanol** is derived from plant source, increases cell division and cell elongation resulting in enhanced root and shoot growth. It improves mineral uptake from the soil, plant moisture retention and synthesis of proteins. Increases the rate of photosynthesis, promotes more tillers, branching and flowering.

## DIRECTION FOR USE

Apply 5 to 10 kg of **Multiplex Navajeevan-G** per acre for field and vegetable crops. For plantation crops apply 50 to 100 grams per plant.

## BENEFITS OF MULTIPLEX NAVAJEEVAN-G

- Helps in initial establishment of plants by better seed germination, faster growth of root and seedlings
- It improves soil texture, water and nutrient retention
- Improves uptake of applied nutrients which in turn enhances photosynthetic activity
- It helps in developing resistance to environmental stress, pest and diseases
- It is a natural chelating agent and eco-friendly product
- Reduces transplantation shock and helps in speedy establishment with increased tillers in plant
- Improves Branching, flowering and fruit setting
- Improves the yield both by quality and quantity
