100% WATER SOLUBLE COMPLEX FERTILIZER

Foliar Spray Fertilizer for All Crops

MULTIPLEX NP-PLUS is a 100% water soluble Mono Ammonium Phosphate complex fertilizer containing Phosphorus and Nitrogen in the ratio 12:61:00. The Phosphorus and Nitrogen are in easily soluble and available form. It easily dissolves in water without leaving any residues. On dissolution, ammonium and phosphate ions are released immediately and are easily absorbed by the plants. This improves root, shoot growth along with health of plants. Phosphorus and Nitrogen are structural components of cell and cell organelles. They play vital role in photosynthesis, activation of several enzymes required by plants and energy transfer within the plants. The ammonium ion reduces the pH of the soil surrounding root zone which facilitates quick absorption and uptake of phosphorus. This product is suitable for both foliar and for field application through drip irrigation.

DIRECTION FOR USE

FOR FOLIAR SPRAY: Dissolve 4 to 5 gms of Multiplex NP-Plus in one litre of water and spray on plants.

FOR FERTIGATION: Use 1 to 3 Kg of Multiplex NP-Plus per acre either through drip or through sprinkler.

Note: Multiplex NP-Plus should not be mixed with Calcium and Magnesium containing fertilizers.

BENEFITS OF MULTIPLEX NP-PLUS

- Corrects the Nitrogen and Phosphorus deficiency immediately.
- Improves root, shoot growth and keeps plants healthy
- Improves fertilization.
- Reduces flower drop and increases fruit setting
- Improves the yield both by quality and quantity
