

PADDY SPECIAL[®]

MULTI MICRONUTRIENTS FERTILIZER

Farmers' first choice since 1974

PADDY SPECIAL[®]

MULTI MICRONUTRIENTS FERTILIZER

Multi-micronutrients fertilizer Paddy special is a balanced multi-nutrient product containing secondary nutrients like Calcium, Magnesium, Sulphur and Micronutrients like Zinc, Manganese, Iron, Molybdenum & Boron. Paddy plants acclimatize to a varied environment; hence it thrives both in tropic and temperate zones. Paddy crops can also be grown in saline and alkaline soils. During growing stages, paddy requires a large quantity of major, secondary & micronutrients. Application of NPK fertilizers neglecting the replenishment of secondary and micronutrients results in reduction of yield and poor quality of paddy crops. To increase the quality of yield and productivity balanced application of nutrients is very much necessary. The application of Multi-micronutrients fertilizer Paddy Special will help to meet the paddy crop requirement with respect to essential secondary nutrient and micronutrients requirement and increases the yield both by quality and quantity.

DIRECTION FOR USE

For Soil Application: Apply 5 to 8 kg of Multiplex Paddy Special/ acre at the time of transplanting.

For Foliar Application: Dissolve 2.5 g of Multiplex Paddy Special in one litre of water and spray on both the surfaces of the leaf. First spray 15 to 20 days after transplanting and following Second spray during 20 to 25 days after the first spray.

BENEFITS OF MULTIPLEX PADDY SPECIAL
