PRANAM-Ca

CONCENTRATED LIQUID CALCIUM 11%

CALCIUM DERIVED FROM NATURAL SOURCE

(WATER SOLUBLE ORGANIC CALCIUM LIQUID)

Farmers' first choice since 1974

PRANAM-Ca

CONCENTRATED LIQUID CALCIUM 11%
CALCIUM DERIVED FROM NATURAL SOURCE
(WATER SOLUBLE ORGANIC CALCIUM LIQUID)

Multiplex Pranam-Ca Contains Water Soluble Organic Calcium. It is a multi-nutrient fertilizer, which has calcium (11 to 15%) along with other nutrients like, Nitrogen and Boron in easily available form to plants. This product is biologically derived from a biological source containing calcium and thus reduces carbon footprint in the environment. This can be used for foliar spray as well as in drip irrigation.

Calcium is an important essential nutrient required for plants for cell division, cell wall integrity, stable membrane structure, permeability, nodulation enhancement in legumes and regulation of enzyme synthesis. Calcium is immobile in plants and deficiency leads to improper cell division, poor development of terminal buds and apical root tips resulting in deformed tissues or death of the growing points.

DIRECTION FOR USE

Mix 3 ml of Multiplex Pranam-Ca in one litre water and spray on plants. We recommend using this product on Tomato, Chilly, Apple, Sugarcane, Cotton, Grapes, Citrus, and all vegetables.

Note

- ◆ For better result spray during flowering & fruit development stages
- ◆ Use the prepared spray solution immediately after preparation. Factors like rain and high temperature can reduce the efficiency of the product

CAUTION: Do not mix with Sulphur and Phosphorus containing fertilizers

Available Packing: 100 ml, 250 ml, 500 ml & 1 Liter

BENEFITS OF MULTIPLEX PRANAM-Ca

- ◆ Plays essential role in both plant nutrition and soil health
- ◆ Reduces flower and fruit droppings
- ◆ Increases chlorophyll content in leaves
- ◆ Helps to build strong cell walls and gives firm structure to plants
- ◆ Improves colour of the skin of potato, keeps curd of cauliflower bright white
- ◆ Reduces bitter pit in apples, cork spot in pears, blossoms end rot in tomato and melons, firmness, and cracking in cherries
- ◆ Enhances keeping quality of the Vegetables
- ◆ Improves pegging and pod formation in ground nut
- ◆ Improves the yield both by quality and quantity
