RAISE

Chlorantraniliprole 18.5% w/w SC

INSECTICIDE

Farmers' first choice since 1974

MULTIPLIX RAISE

Chlorantraniliprole 18.5% w/w SC

Ryanodine receptor modulators belong to Diamide of IRAC group 28. Broad spectrum, Systemic and Contact insecticide.

TARGET PESTS: Used against lepidopteran pests like Stem borer, Leaf folder, Diamond back moth, American bollworm, Spotted bollworm, Tobacco caterpillar, Termite, Early shoot borer, Top borer, Fruit borer, Semi looper, Stem fly and Girdle beetle.

DIRECTION FOR USE: 0.3 to 0.5 ml/ liter of water.

SPECIAL FEATURES: Chlorantraniliprole is effective against chewing insects pest primarily by ingestion and secondarily by contact.

BENEFITS OF MULTIPLIX RAISE

- **High Efficacy:** Raise insecticide is highly effective against a broad spectrum of insect pests, providing excellent control in crops.
- **Long-Lasting Protection:** Raise insecticide provides long-lasting protection against insect pests, with residual activity lasting up to 25-30 days.
- **Low Dose:** Raise insecticide is a low-dose insecticide, meaning that it provides effective control at low application rates, reducing the environmental impact and the risk of developing insecticide resistance.
- **Selective:** Raise insecticide is highly selective, targeting only the pests and leaving beneficial insects unharmed.
- **Flexible Application:** Raise insecticide can be applied as a foliar spray, seed treatment, or soil drench, giving farmers flexibility in their pest management strategies.

AVAILABLE PACKING: 10 ml , 30 ml, 60 ml & 150 ml
