# SUGARCANE SPECIAL

## MULTI MICRONUTRIENTS FERTILIZER

# शुगरकेन स्पेशल

## मल्टी माइक्रोन्यूट्रिएंट फर्टिलाइजर

Multiplex Sugarcane special contains secondary nutrients like magnesium, calcium and Sulphur following micronutrients such as zinc, copper, iron, boron, manganese, and molybdenum in balanced quantity. Sugarcane is a perennial grass grown for its stem (Cane), which is primarily used to produce sucrose(sugar). Sugarcane crops are long duration crops (12 to 18 months), sensitive to climate, soil type, irrigation, fertilizer, pest and disease management, varieties and harvesting type. Sugarcane requires sufficient water, comparatively large quantity of fertilizer and abundant sunlight, with high rate of photosynthesis requires essential secondary and micronutrients. Moreover, application of only NPK fertilizer resulted in reduction of quality yield, susceptible to pests and diseases. Therefore, Multiplex Sugarcane Special comprising secondary nutrients and micronutrients should be applied to sugarcane crops assists in proper absorption and assimilation of applied nutrients resulting in desired quality and quantity yield.

### DIRECTION FOR USE

**For Soil Application:** Use 10 kg of Multiplex Sugarcane Special per acre at the time of sowing and another 05 kg per acre as a second dose at around 75 to 85 days or during earthing-up.

### BENEFITS OF MULTIPLEX SUGARCANE SPECIAL

- Increases the absorption & utilization of other nutrients from soil
- Keeps plants healthy by increasing resistance to diseases
- Maintains overall health, growth & development of the plant including tillering, cane size, inter-nodal distance and cane weight
- Application of Multiplex Sugarcane Special increases the tillering, cane size, internodal distance and overall weight of the produce
- It also keeps plant healthy by increasing resistance to diseases
- Improves yield by both quality and quantity

**Available Packing:** 5 kg and 10 kg
